

Desertification based on Geohistorical Records with Reference to Cholistan Desert

Prof. Dr. Abdul Ghaffar
Department of Zoology
Faculty of Biosciences
CUVAS, Bahawalpur

Proxy Indicators

Personnel communications

Dendrochronology: study of tree rings

Historical documents: paintings, evidence of civilizations

Fossils: Studies of geological settings/stratigraphy

Isotopic Geochemical Studies: The study of rock isotopic ratios, ice core bubbles, deep sea sediments, etc.

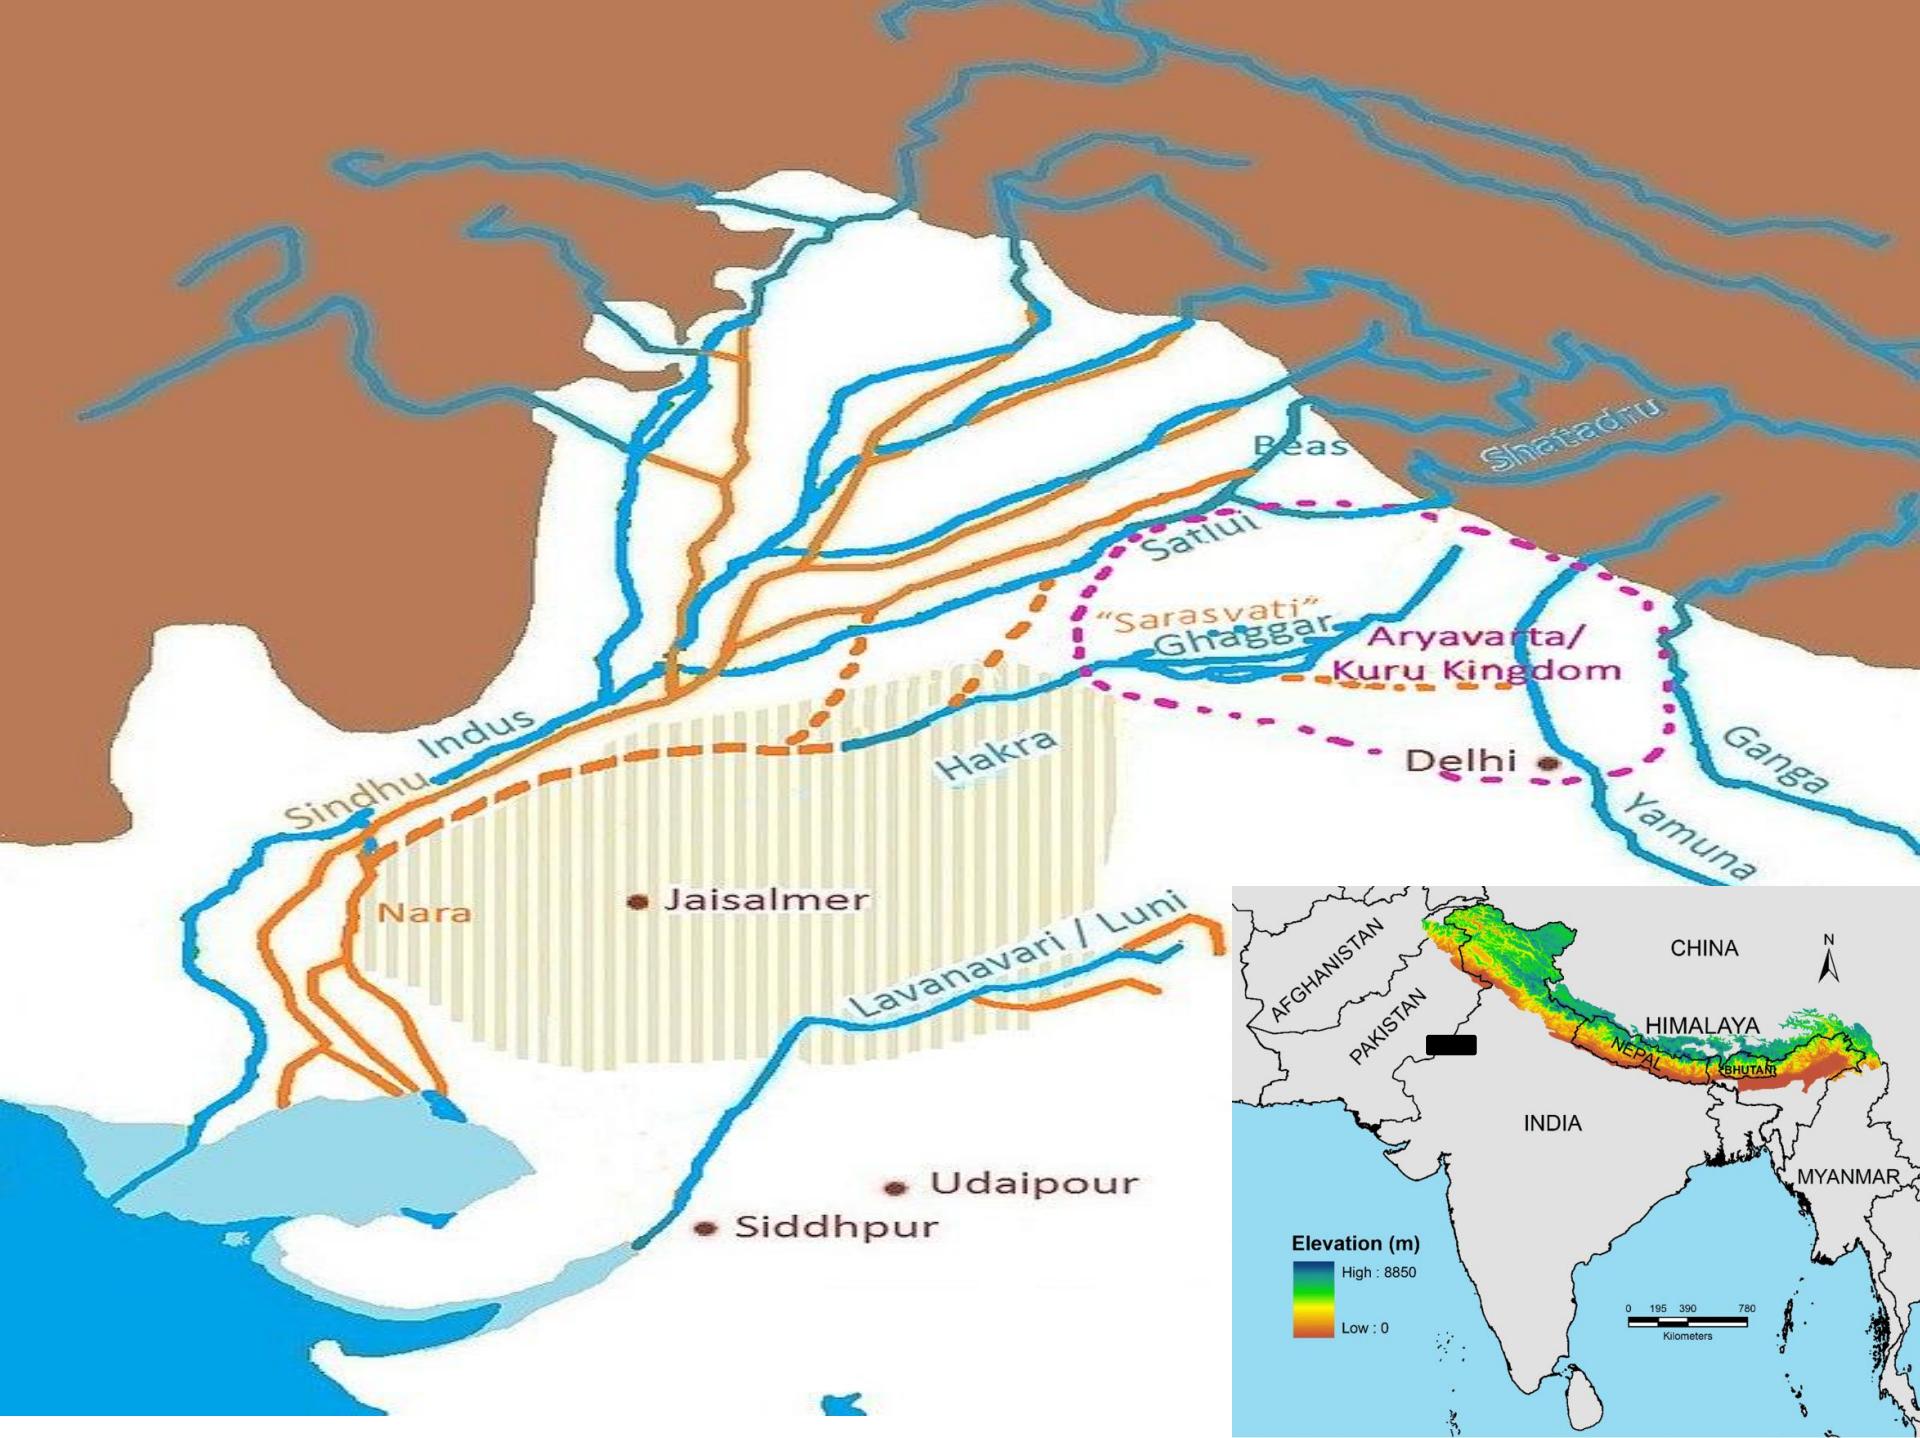

Pollen Distribution: the study of plant types and prevalence from pollen found in sediments, ice, rocks, caves, etc.

Lake Varves: (a varve is an annual layer of mud in the sediment)

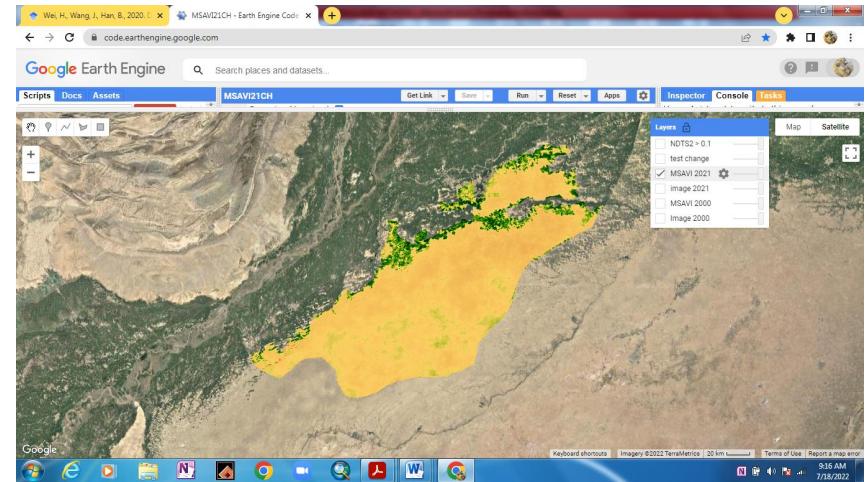

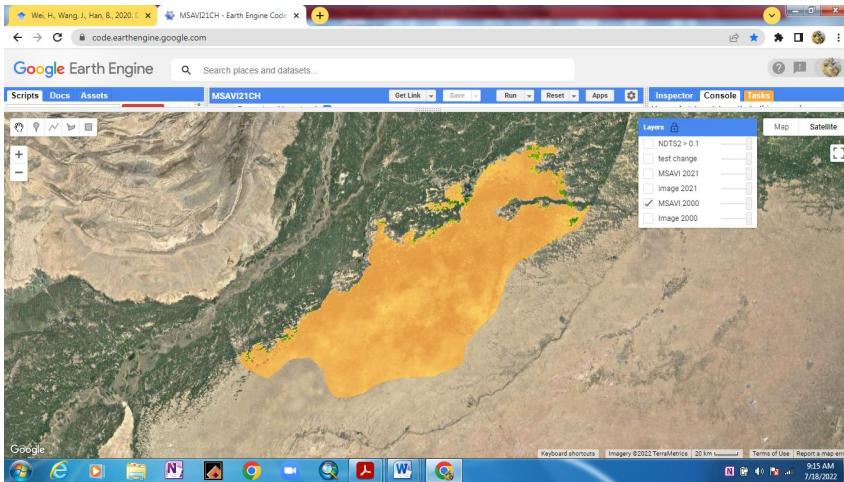

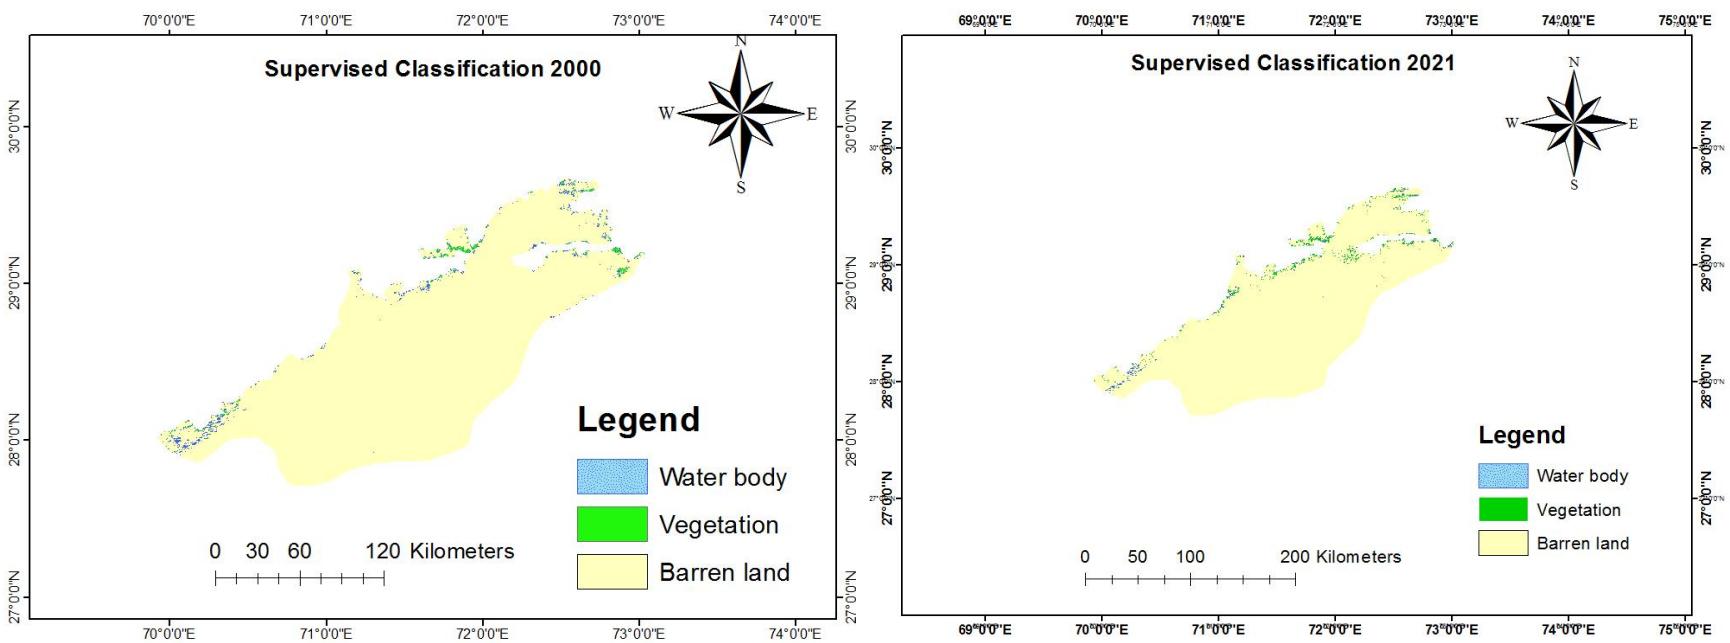

Cholistan Desert

- Depositional Environments
- Geographical Position
- Geopolitical Position
- Contribution of eastern vs western Rivers
- Hydrological threats

LULC 2000 vs 2021

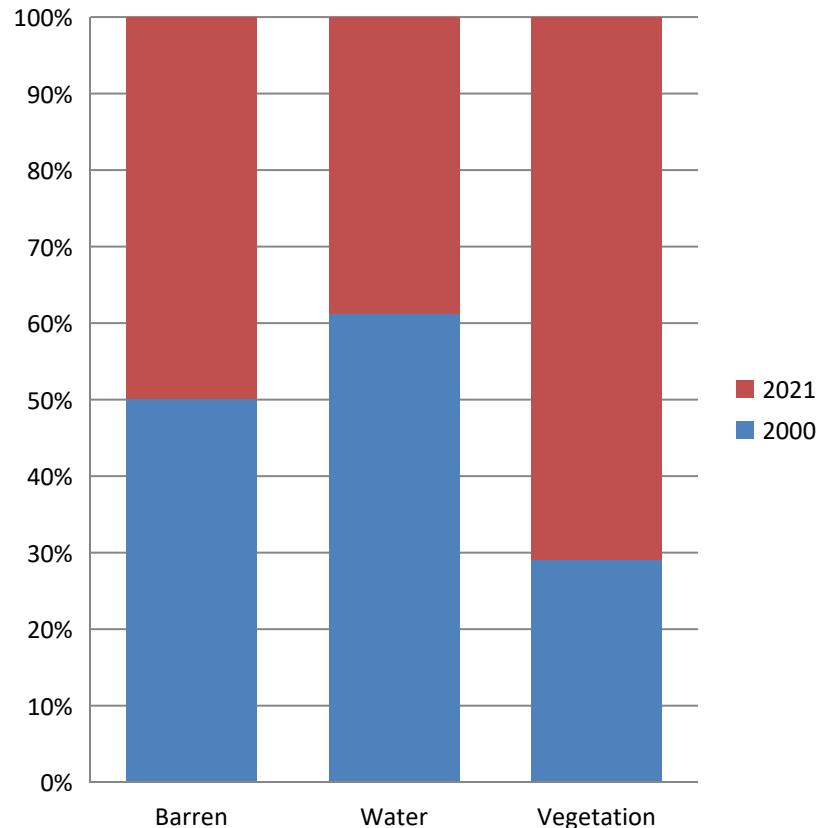

Cholistan region livestock data

	Cow	Buffalo	Sheep	Mule	camel	Donkey	Horse	Goat	Total
2018	413193	10588	530963	37	16037	3621	13	219296	1196448
2006	567510	9923	356024	106	11328	6429	922	257285	1209527

stack graph for LULC 2000-2021

LULC of Cholistan

LULC	2000		2021	
Classes	Area (ha)	%	Area (ha)	%
Water body	35251.5216	1.333955	22252.3110	0.84209
